Met Office Aberdeen Meteorologist's View
Winds a good 10-15mph stronger than shown in the data table near west coast and Skye.

Forecast for Wednesday 15 Feb 2023

Weather: Clear and dry start to the early hours in the east but cloud and rain will arrive from the west overnight, this falling as snow initially above 1000m but dropping to 600m through the morning. It will then brighten up during the afternoon to bring some sunny intervals, though with a few showers following later these again of snow above about 700m.

Maximum wind: Southerly 50 gusts 70mph in early hours becoming southwesterly 30 gusts 40mph in the morning.

Chance of cloud-free hill tops above 800m: 10% at first rising 60% during the afternoon.

Low cloud and visibility: Extensive cloud at 600-750m in morning and early afternoon, though locally 450m near west coast, with poor visibility in rain, snow and mist, becoming broken or well broken and lifting 750-900m, visibility then mainly good away from the cloud, but briefly moderate to poor as any showers pass through.

Temperature: **Glens:** Plus 7 Celsius falling to 5 Celsius
At 800m: Plus 3 Celsius falling to Minus 1 Celsius
Freezing level: Above summits in early hours then falling 700m during the morning.
